

Datasheet

A76 Alkaline Cell Battery 1.5v

Specifications:

Alkaline Button Cell batteries supply power to a wide range of small electronic devices, from calculators, toys and keyless entry systems to electronic books.

They are all powered by small but powerful button cells manufactured by GP Batteries. Mercury Free Zinc/Manganese Dioxide chemistry

Button cell type

Nominal voltage: 1.5v

Approx. service capacity: 110 mAh

Average weight: 1.9g

Cross Reference:

| IEC | JIS | Eveready | Varta | Duracell |
|------|------|----------|-------|----------|
| LR44 | LR44 | A76 | V13GA | LR44 |

| Manufacturers Code | Description | Voltage (v) | Nominal Capacity (mAh) | Dia mm | Height mm |
|--------------------|------------------|-------------|------------------------|--------|-----------|
| BATTERY | A76 Cell Battery | 1.5 | 110 | 11.6 | 5.4 |

Datasheet

A76 Alkaline Cell Battery 1.5v

Guidance instructions:

- Always install the batteries correctly as per instruction
- Ensure that the contact points are clean and conductive
- Do not mix different types of battery
- Do not heat or attempt to recharge the battery
- Do not dispose of in a fire

Typical discharge characteristics at $20^{\circ} \pm 2^{\circ}$
